Abstract. Vibration medicine does nothing more than to stage all disciplines, techniques, methods and practices that use energy as a core element. Vibration medicine may thus be equated with trying to heal the body in its entirety by harmonizing the primordial vibration or energy.

Keywords: bio-phyto-modulator, bioresonance, ganglio-lymphatic system

INTRODUCTION

Through the phenomenon of resonance bio-phyto-dynamic modulators can provide the human system that subtle amount of energy that requires facilitating the transition of the vibration of the disease in the health.

Ganglio-lymphatic system represents all vessels, glands, organs carrying and participates in the exchange of humoral substances and is related to the circulatory system and immunity. It consists of lymph vessels, lymph nodes, thymus, spleen and tonsils. He performed a purification center, sewerage, drainage and at the same time is a hub for immunity by producing antibodies, blood cells and cell aging treatment.

MATERIALS AND METHODS

Interdependence - interconnectivity of these two systems is very strong physically and energetically. Disorders from the energy body often arrive to install in the form of disease on the physical body. Entropy describes the tendency of a system disorder. Living systems tend to reduce clutter in the system with vital force.

Oberon uses non linear analysis of biofeedback diagnosis by spectral analysis of the fields, the magnetic vortex of biological organisms using quantum entropy theory. Accuracy of diagnosis is between 90-95% and 80-85% at the cellular level.

The purpose of this paper is to demonstrate the influence of bio-phyto-modulators on the lymphatic system with direct implications for those diverse pathologies independent of age, sex, level of energy.

We aimed association benefit of modulators for environmental.

RESULTS AND DISCUSSION

We studied 28 patients who carried DIEE bio-phyto-modulators to chest area, pancreas-spleen, liver, cervical and lumbar, pads for a period of 12 weeks using additionally DEA, DNRN-GSM – 13 patients and DNRN-3 - 16 patient. Diagnosed disorders can be systematized as follows:

a) Allergies;

- b) Respiratory inflammation;
- c) Repeated edema in the legs;
- d) Joint edema;
- e) Edema after radiotherapy;
- f) Adenopathy of benign and malignant origin;
- g) Adenoiditis;
- h) Anemia.

I will present test results after 12 weeks of wearing the bio-phyto-modulators on thymus, pancreas-spleen and ganglio-lymphatic system.

Tab. 1

Percentage evaluation of compensation reactions on organs and systems after 12 weeks of wearing DIEE, DNRN-GSM și DEA

No.	Liver	Pancreas-spleen	Ganglio-lymphatic system	No.	Liver	Pancreas-spleen	Ganglio-lymphatic system
1	11	20	10	15	7	6	7
2	16	35	11	16	74	65	42
3	7	4	16	17	65	30	28
4	6	3	15	18	13	21	15
5	3	12	23	19	24	14	18
6	35	16	14	20	19	17	40
7	28	27	12	21	17	15	41
8	17	19	21	22	14	12	15
9	10	21	35	23	3	10	12
10	21	15	20	24	8	10	17
11	34	12	21	25	11	12	14
12	19	9	14	26	14	13	21
13	24	15	13	27	18	14	16
14	15	8	10	28	31	28	21

Patients are:

- a) 14 children of 3 - 12 years;
- b) 8 were aged between 21 -31 years;
- c) 6 were between 65 and 84 years.

Patients from the study were presented during 01.01.2011 - 01.05.2011.

The tests were presented:

- a) In January - 14 patients
- b) 20 patients - in February
- c) 13 patients - in March
- d) In April - 20 patients, a total of 67 patients.

To control were presented:

- a) 5 patients in January
- b) 8 patients in February
- c) in March 7 patients
- d) in April 8 patients in total: 28 patients.

Only for 22 patients ganglio-lymphatic entropy levels decrease from 6-7 at 1-3.

CONCLUSIONS

Reaction to bio-phyto-modulators is conditioned by age, sex, disease stage or severity, associated diseases. Reaction is objectively and subjectively positive. Difference is the level at which the recovery starts. It was proved Recovery response amplification by DEA and DNRN-GSM association. It was shown the positive effect of bio-phyto-modulators in operational efficiency and morphological recovery. The future of holistic medicine will depend on integrating vibration medicine therapy in current practice. Bio-phyto-modulators balance and normalize energy and entropy decreases.
