### SUMMARY

The study that performed wants to highlight the major diseases of sheep and to exploit their economic consequences to decide some measures of economic management and veterinary care for sheep farms in radius CSVA Tășnad. CSVA Tășnad has four employees: 3 veterinarians and a veterinary assistant. They provide veterinary medical care for the whole district, that town and six villages belonging Tășnad.

As the number of sheep farms animals can group them into: large farms (>5000 heads), medium-sized farms (500-1000 heads), small farms (<500 heads). The study is applied by unprofessional individuals farms. The study material will be the 14 farms with 13320 sheep which are stock in addition we will study these animals and products such as milk lambs and quantity to each owner individually. Animals owners were involved in this study benefits understanding the conclusions and recommendations that we will be able to formulate from such research. For having a more clear and enlightening on disease epidemiology have formulated a protocol to follow in each case and have it called "observation chart". Besides the case study we have observed and surveillance actions and diseases contained in national strategic program by passing a separate records of each veterinary actions, that directly or indirectly involved sheep.

Tab. 1.

Diseases on the register of consultation and treatment in 2009

Diseas group in diagnosticated cases	Farms		
	Large	Medium	Small
Infectious diseases	14	31	44
Parasitic diseases	6	34	96
Surgical diseases	212	101	58
Reproductive diseases	43	12	6
Nutrition and metabolic diseases	9	23	2

Tab. 2.

Tests results processed on Laboratory Sanitary Veterinary Direction Satu Mare 2009

	Diseas								
	B160	Abort ed	B151	B059	B161	B152	Parasit es	Enteroto xiemies	Wather
Probe (no)	2	0	173	443	0	250	0	0	0
Results (+)	0	0	3	23	0	0	0	0	0
Dubious	0	0	0	2	0	0	0	0	0

Bridging all these results we believe will provide clear points of support to build a veterinary medical management plan and economic growth of sheep, which find application in both the practical and immediate Tășnad and elsewhere in the country.

**Keywords:** diseases, epidemiology, treatment, animals owners, economy.
